

PROFESSIONAL SUMMARY

- Data science professional with 7+ years of software engineering experience building scalable, production-grade systems.
- Data Science Certificate student at the University of Toronto DSI, applying theory to real-world data problems.
- Experienced in end-to-end analytics and ML pipelines, from data ingestion and modeling to deployment and reporting.
- Proficient in Python, SQL, applied machine learning (scikit-learn), A/B testing, and CI/CD workflows for production analytics.
- Practical and collaborative problem-solver, effective with cross-functional and non-technical stakeholders.
- Seeking Data Scientist or Machine Learning Engineer roles to deliver scalable, data-driven business impact.

TECHNICAL SKILLS

Programming & Data Manipulation: Python, SQL, pandas, NumPy

Machine Learning, AI & Modeling: scikit-learn, PyTorch; feature engineering, model evaluation, cross-validation, hyperparameter tuning; model interpretation, langchain, langgraph, crewai, rag.

Experimentation & Product Analytics: A/B testing, model validation, and evaluation with statistical and business metrics

Data Visualization & Reporting: Matplotlib, Seaborn, exploratory data analysis (EDA), dashboards

Data Apps & APIs: Streamlit, Gradio, FastAPI

Testing, Deployment & MLOps: pytest, Docker, Git, GitHub Actions, MLflow, CI/CD workflows

PROFESSIONAL EXPERIENCE

Product Manager, Customer Experience
Company V

2019 — 2024

- Led proposal, design and development of digital products (websites, landing pages, chatbots, mobile apps), integrating analytics from CRM, Google Analytics, AppsFlyer, and industry benchmarks to improve engagement and conversion; delivered 30+ projects, retaining 70% of customers.
- Performed large-scale qualitative and exploratory analysis on thousands of chatbot conversation logs to identify failure patterns and message drop-offs; redesigned Chatfuel chatbot flows, reducing stuck messages by over 90% and significantly improving customer retention.
- Applied heuristic evaluation using Nielsen's usability principles and quantitative funnel analysis to identify UX friction points; redesigned websites and landing pages, increasing conversion rates by over 60%.
- Analyzed user behavior, bounce rates, and conversion funnels using Google Analytics to identify drop-off points and optimize UX, maintaining bounce rates below 40% and converting 7.5% of traffic into qualified leads.
- Evaluated customer engagement across multiple learning channels to uncover experience fragmentation and personalization gaps; informed the development of a unified learning platform, resulting in a 4.5-star rated application.
- Led monthly and quarterly performance reporting, synthesizing engagement, conversion, and operational metrics into actionable insights and recommendations, maintaining 80% customer satisfaction.

- Developed award-winning mobile applications for marketing campaigns, analyzing user acquisition and engagement metrics to achieve 97% quarter-over-quarter business growth, 2× product sales, and 3M downloads within two months of launch.
- Designed and implemented in-app data collection and storage pipelines using Core Data/SQLite, and integrated analytics and attribution platforms (Google Analytics, AppsFlyer), enabling reliable user tracking, funnel analysis, and campaign performance measurement.
- Produced dashboards and regular performance reports on key metrics (downloads, retention, churn, bounce rate, conversion), translating insights into actionable recommendations and collaborating with product, marketing, and stakeholders to align analytics with business objectives.

EDUCATION & CERTIFICATION

Data Science Certificate (2025 – 2026)

University of Toronto - Data Sciences Institute | Toronto, Ontario

- Built end-to-end supervised learning pipelines including data preprocessing, feature engineering, model training, validation, and deployment
- Applied Python (NumPy, pandas, Matplotlib, Seaborn, Plotly) and SQL for data manipulation, visualization, and querying flat-file datasets
- Executed sampling techniques and statistical analyses to ensure accurate, reproducible data insights
- Developed collaborative workflows using Git/GitHub, Unix shell scripting, and CI/CD practices to streamline team productivity
- Created interactive data visualizations and dashboards in Python and Power BI to communicate insights effectively

Master of Science in Computer Science (Research based - Distinction)

Liverpool John Moores University | Liverpool, UK
